The original process philosophy has four stages:

nigredo, the blackening or melanosis

albedo, the whitening or leucosis

citrinitas, the yellowing or xanthosis

rubedo, the reddening, purpling, or iosis

The Tabula Smaragdina is the oldest document said to provide a "recipe". Other texts include the Mutus Liber, the twelve keys of Basil Valentine, the emblems of Steffan Michelspacher, and the twelve gates of George Ripley. Ripley's steps are given as:

1. Calcination 2. Solution (or Dissolution) 3. Separation 4. Conjunction 5. Putrefaction 6. Congelation 7. Cibation 8. Sublimation 9. Fermentation 10. Exaltation 11. Multiplication 12. Projection

In another example from the sixteenth century, Samuel Norton gives the following fourteen stages:

1. Purgation 2. Sublimation 3. Calcination 4. Incineration 5. Fixation 6. Solution 7. Separation 8. Conjunction 9. Putrefaction in sulphur 10. Separation of bodily sulphur 11. Solution of sulphur of white light 12. Fermentation in elixir 13. Multiplication in virtue 14. Multiplication in quantity
